

What I learnt by being a student again

German Perl Workshop 2025

Dave Lambley / <https://dave.lambley.me.uk/> / dave@lambley.me.uk

Sharing the tea.

**I am not at a “Russell Group”
institution.
YMMV**

Matcha latte is a drink.

Basic is now pejorative.

Not where all your knowledge came from.

AI

You

Hello, yes I am. Are you on my course?

No

I'm kaviya ...

Struggling with assignments? StudyZoneOverseas is here to help!

We support international students with high-quality, plagiarism-free, and AI-free academic work—right on time.

What we offer:

- Expert writers for every subject
- 100% original content + plagiarism report
- On-time delivery (even urgent ones!)
- Affordable, student-friendly pricing
- Fully confidential service

Focus on learning—leave the stress to us!

“Microsoft CEO says up to 30% of the company’s code was written by AI”

The future is verbose.

The future may be verbose due to several factors:

Information Overload: As technology advances, the amount of information available continues to grow exponentially. With more data, there is a need for detailed explanations and context to make sense of it all. This can lead to more verbose communication as people try to convey complex ideas clearly.

Complexity of Topics: Many future topics, such as artificial intelligence, quantum computing, and biotechnology, are inherently complex. To understand and discuss these subjects effectively, detailed and nuanced explanations are often necessary, resulting in more verbose communication.

Personalization and Customization: Future communication may become more personalized, with tailored messages for different audiences. This can lead to verbosity as messages are crafted to address specific needs, preferences, and contexts of individuals or groups.

Legal and Ethical Considerations: As society becomes more aware of legal and ethical issues, there may be a need for more detailed communication to ensure transparency and compliance. This can include thorough explanations of policies, procedures, and decisions.

Globalization: With increased global connectivity, communication often needs to bridge cultural and linguistic differences. This can result in more verbose communication to ensure clarity and avoid misunderstandings.

Education and Learning: As education evolves, there may be a greater emphasis on critical thinking and deep understanding. This can lead to more detailed explanations and discussions in educational materials and interactions.

Marketing and Advertising: In the future, marketing and advertising may become more sophisticated, with detailed narratives and storytelling used to engage consumers. This can lead to more verbose content as brands strive to connect with their audience on a deeper level.
